

Instructions how install IPTV Apps on FIRESTICK/FIRE TV

1. From the Main Menu, scroll right to *Settings*

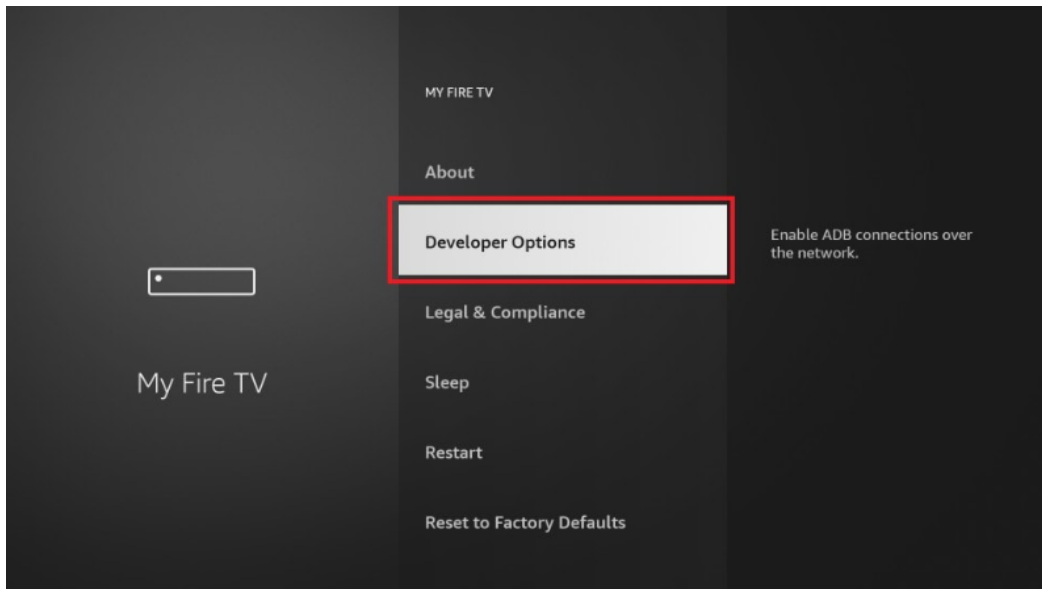

2. Click *My Fire TV*

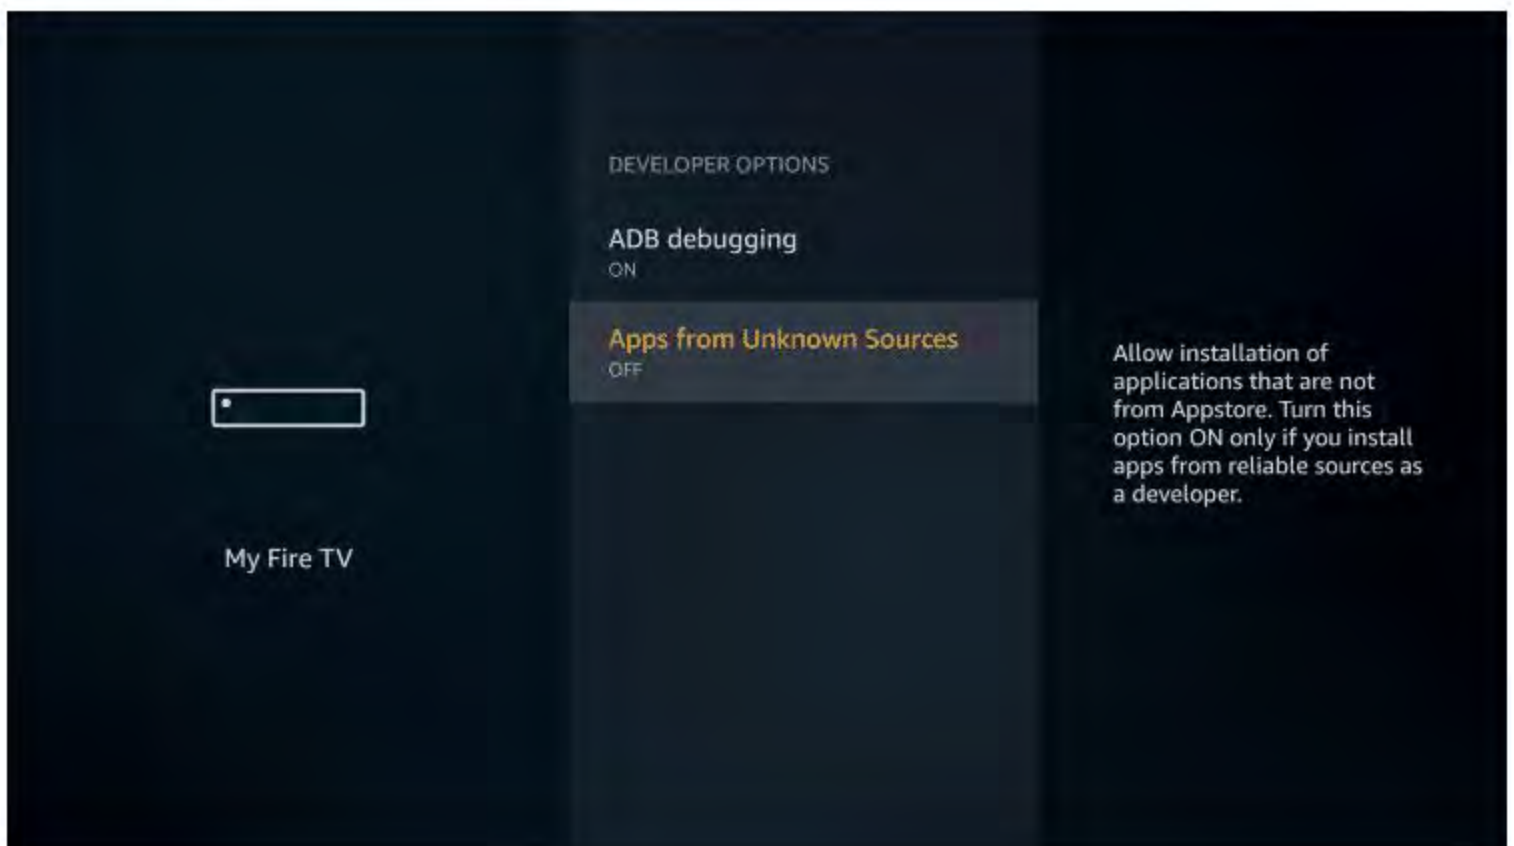

3. Choose *Developer Options*

If you do not see the Developer Option, click "**About**" and then keep clicking the device name until you see "You are now a developer" popup. After that, the Developer Options menu shows up like normal.

Note: Some versions of FireStick may have the option Apps from Unknown Sources instead of Install unknown apps. In that scenario, select the option to turn it ON and skip step 5 below.

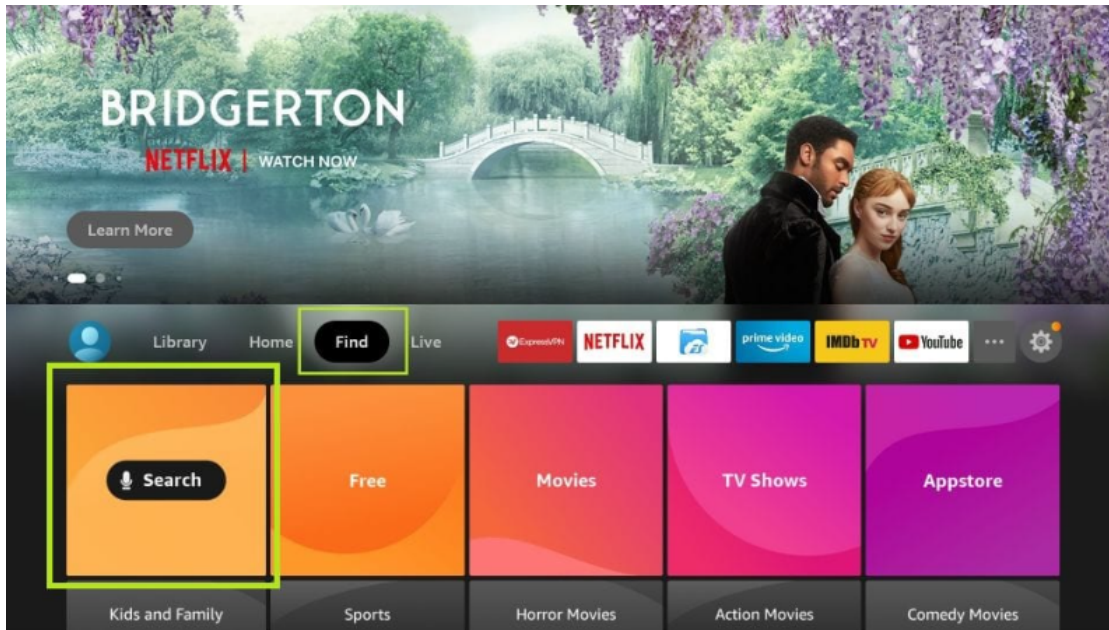

4. Scroll to *ADB Debugging* and click it to turn it on.

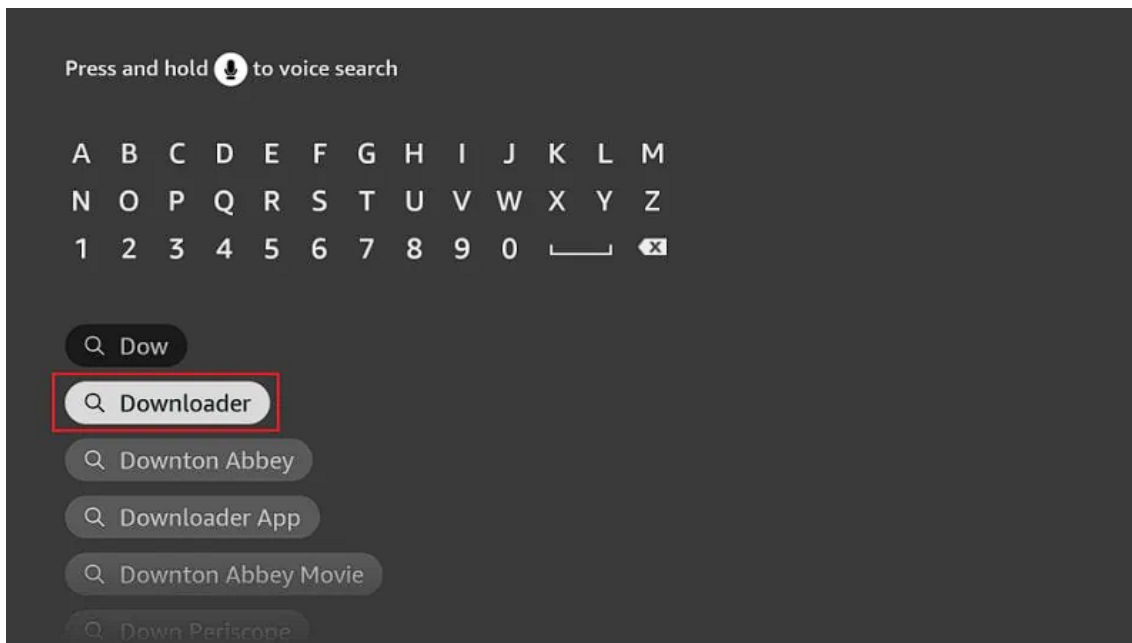

5. Click the Home button to return back to the Firestick home screen.

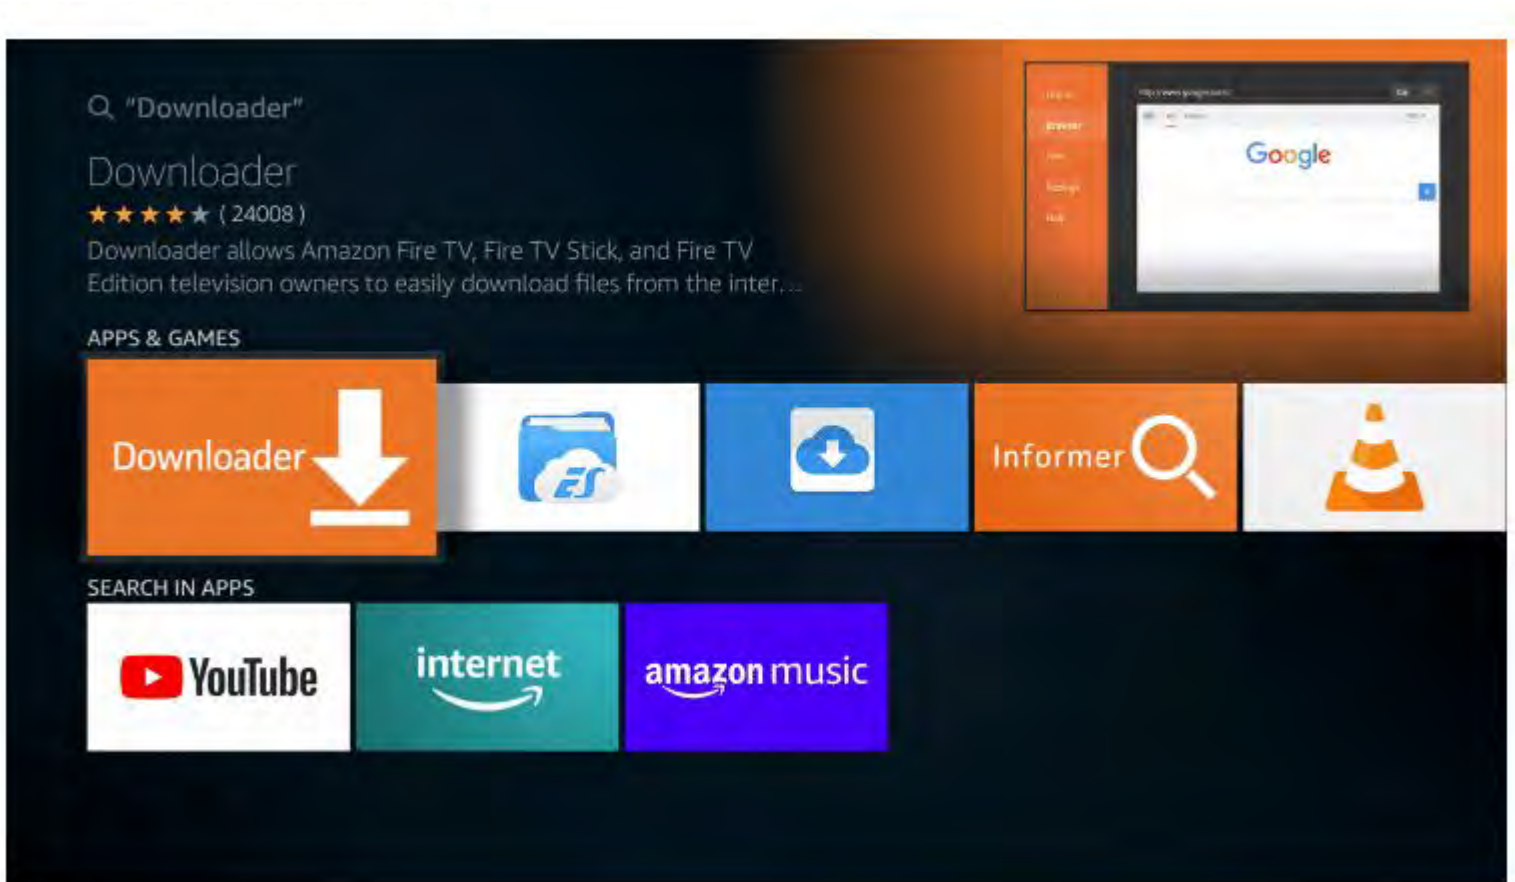

6. On the Home Screen, navigate to **Find > Search** on the menu bar in the middle of the screen.

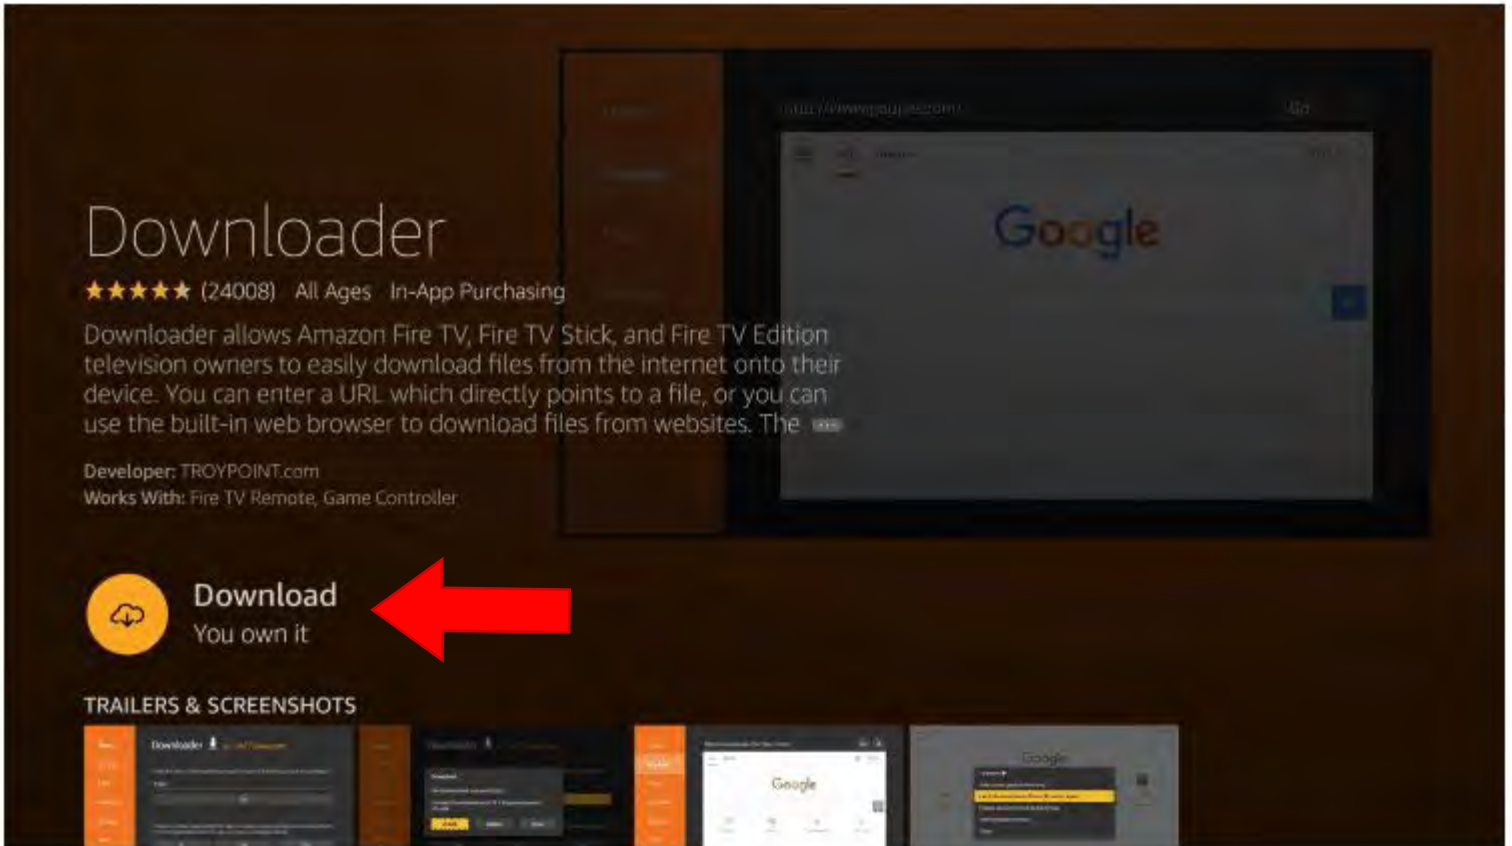

7. Type "Downloader"

8. Select the *Downloader* app.

9. Click *Download*

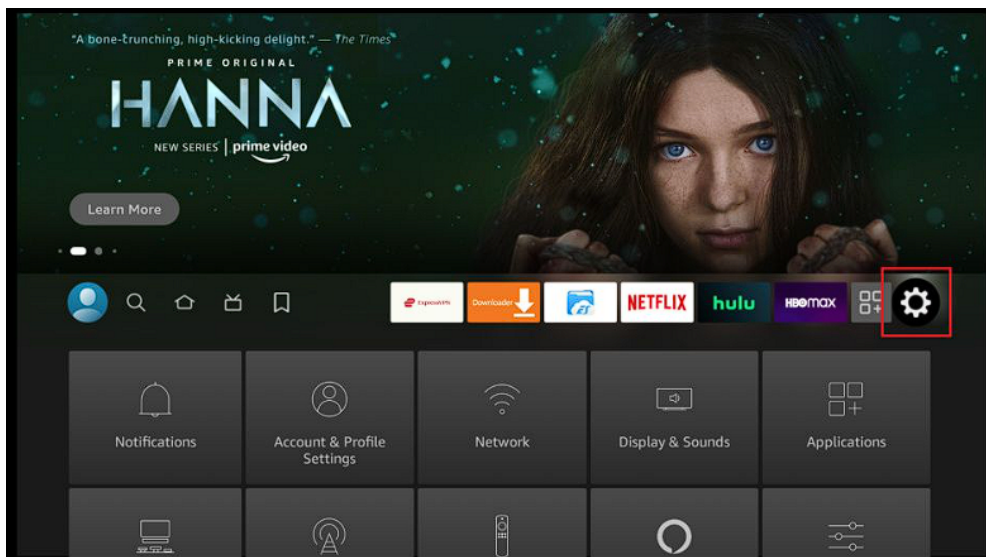

How to Prepare FireStick to Use Downloader and Sideload Apps

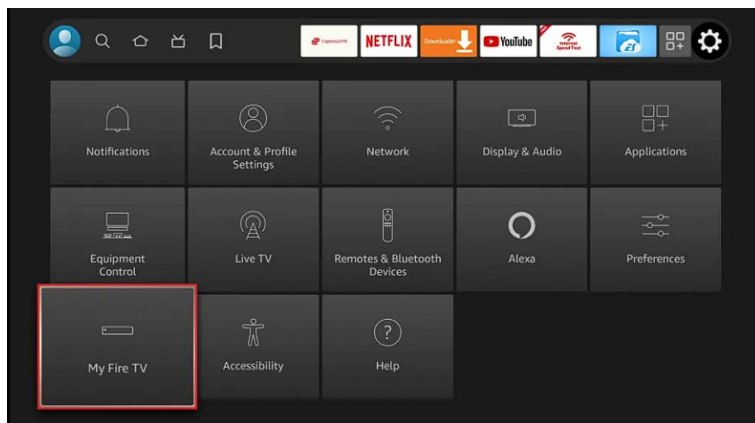

The default setting of FireStick doesn't allow you to install third-party apps as a security measure. Therefore, you won't be able to sideload applications using Downloader until you make a few tweaks.

To install APKs via Downloader, you'll need to allow FireStick to install apps from unknown or third-party sources. Please follow these steps:

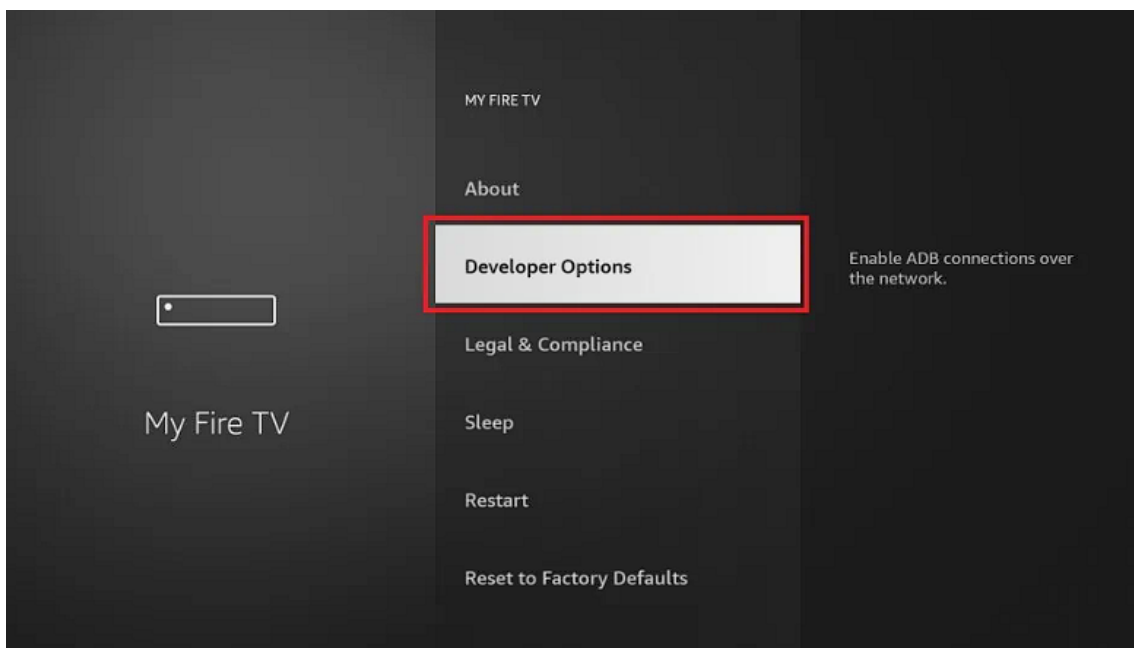

1. Launch your FireStick home screen and navigate to the Settings icon.

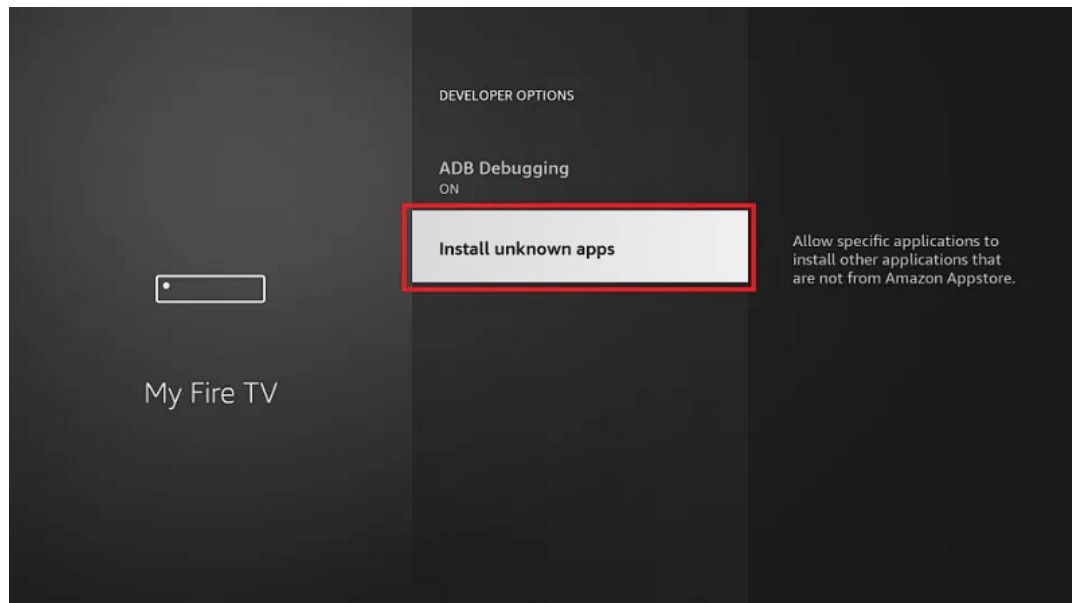

2. Scroll down to the My Fire TV tile and click on it.

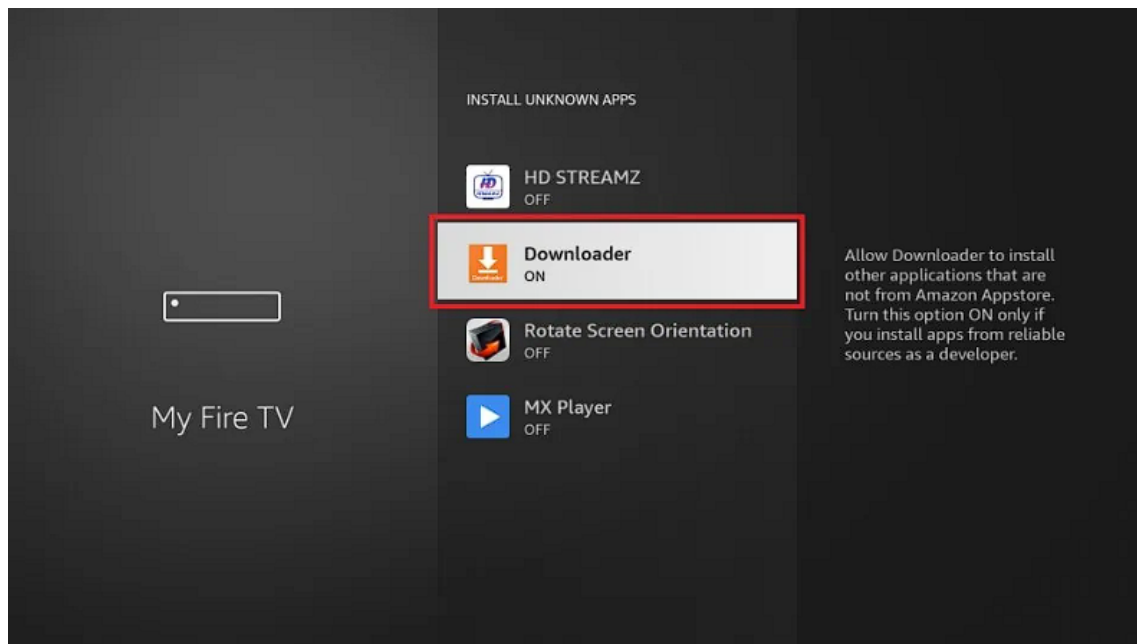

3. Click on Developer Options.

4. Select Install unknown apps.

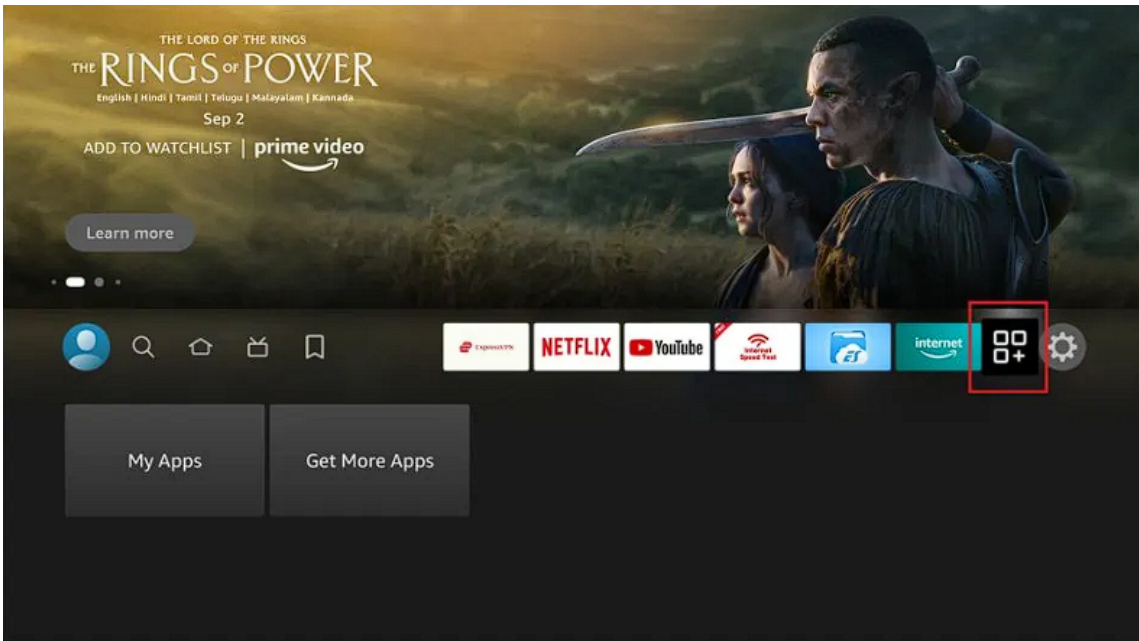

5. Navigate to Downloader and select it to turn it ON.

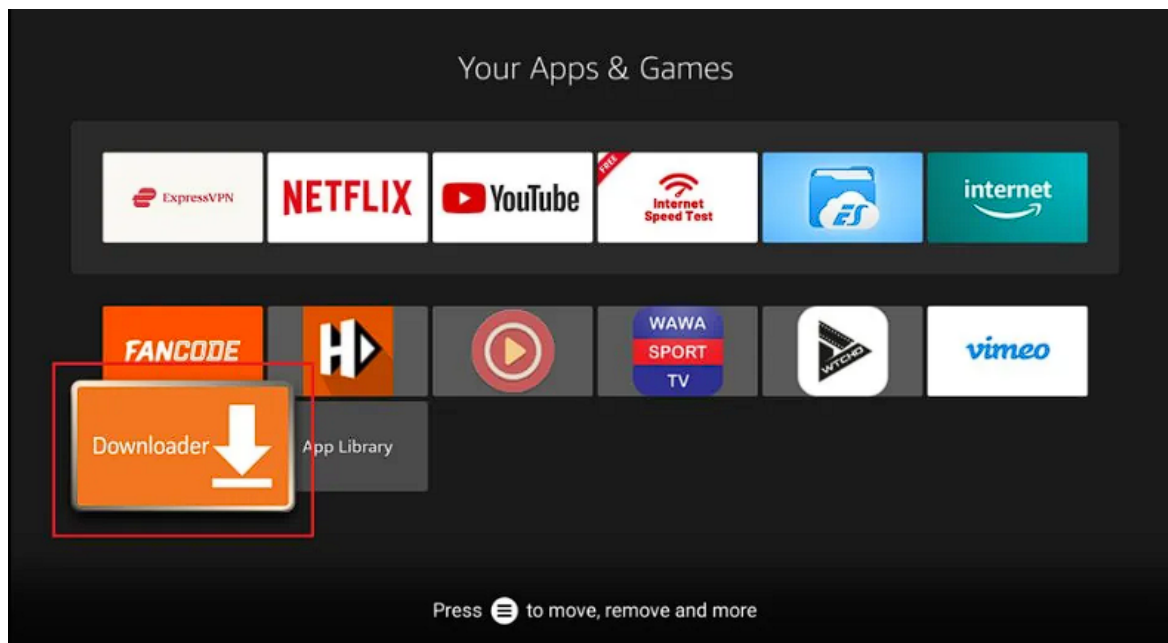

6. Press the Home button to return to the home screen. Your FireStick is now prepared to install various third-party apps using Downloader.

Install Streaming App

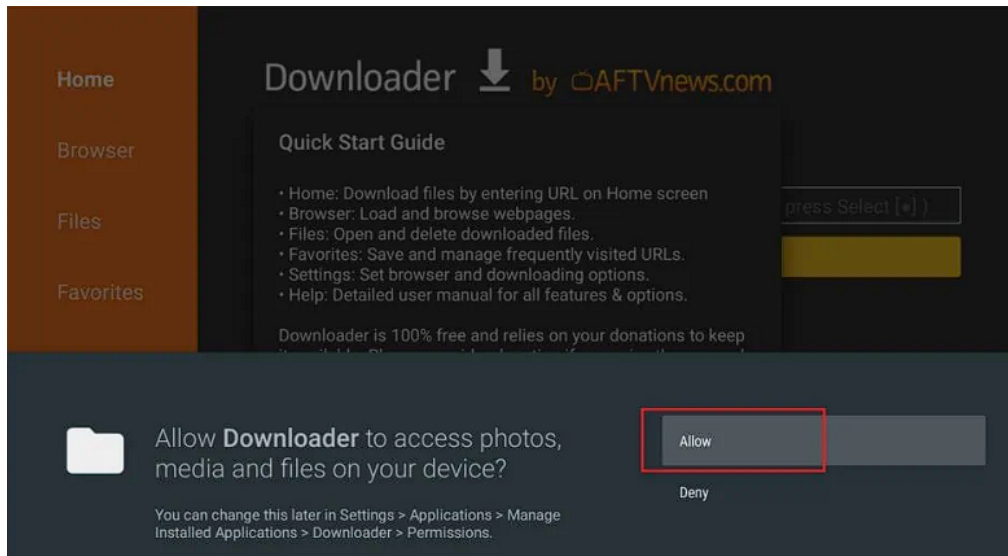

1. Select the app icon on the home screen in the menu bar in the middle (the icon on the right with 3 squares and a + sign).

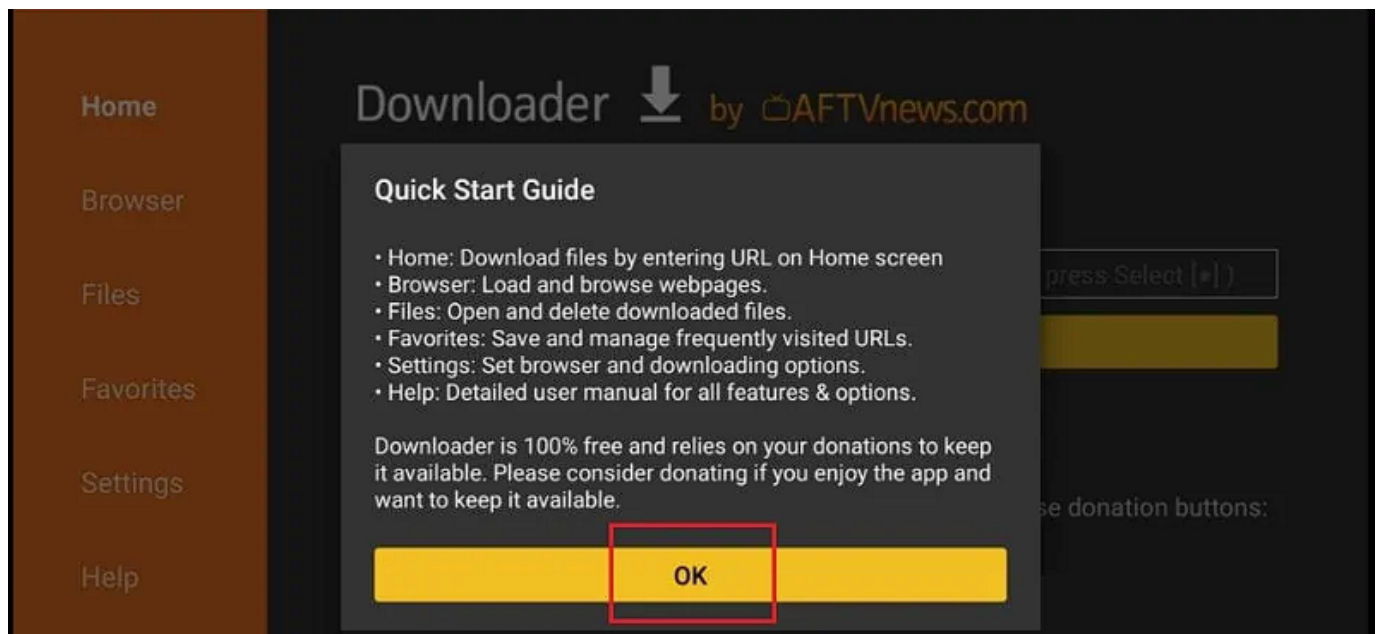

2. Scroll down and click Downloader.

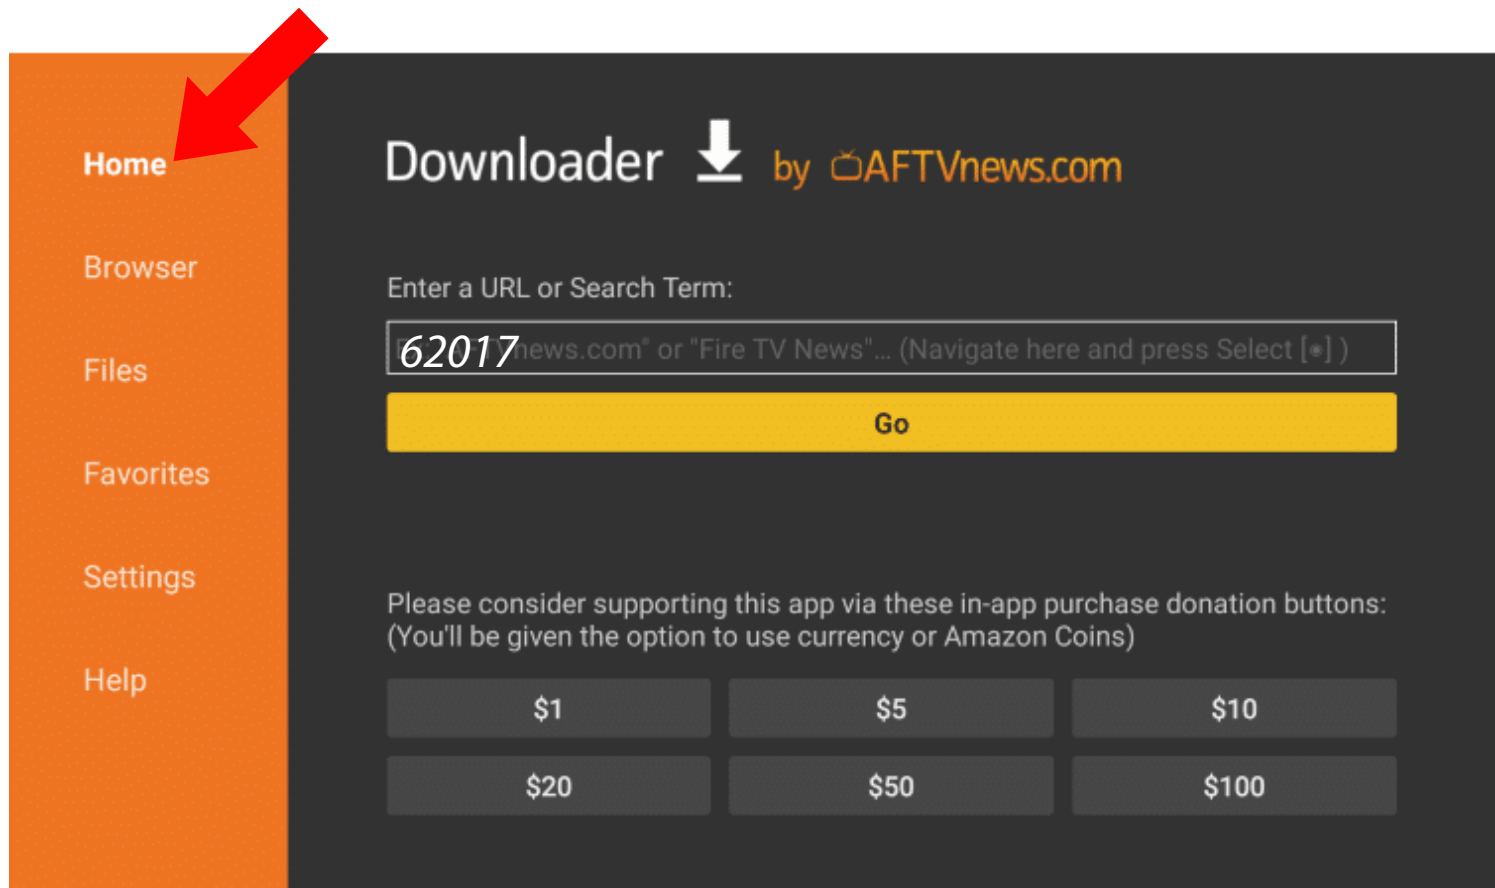

2. When you open the app for the first time, click Allow to grant permission.

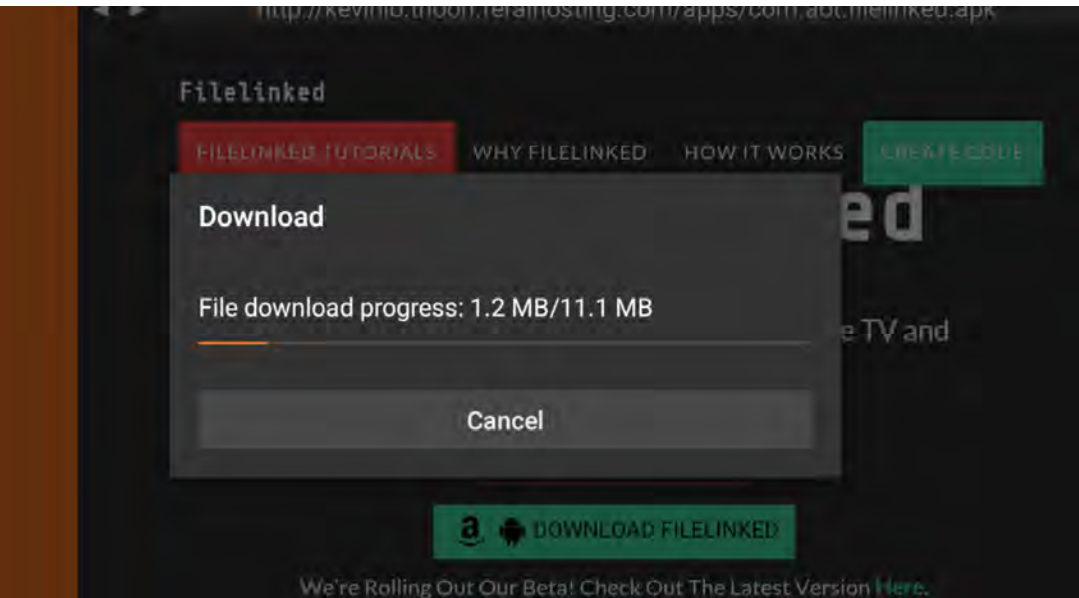

3. Click OK on this Quick Start Guide prompt.

4. Go to the Home section. Type the following code 62017 exactly as shown and then click Go

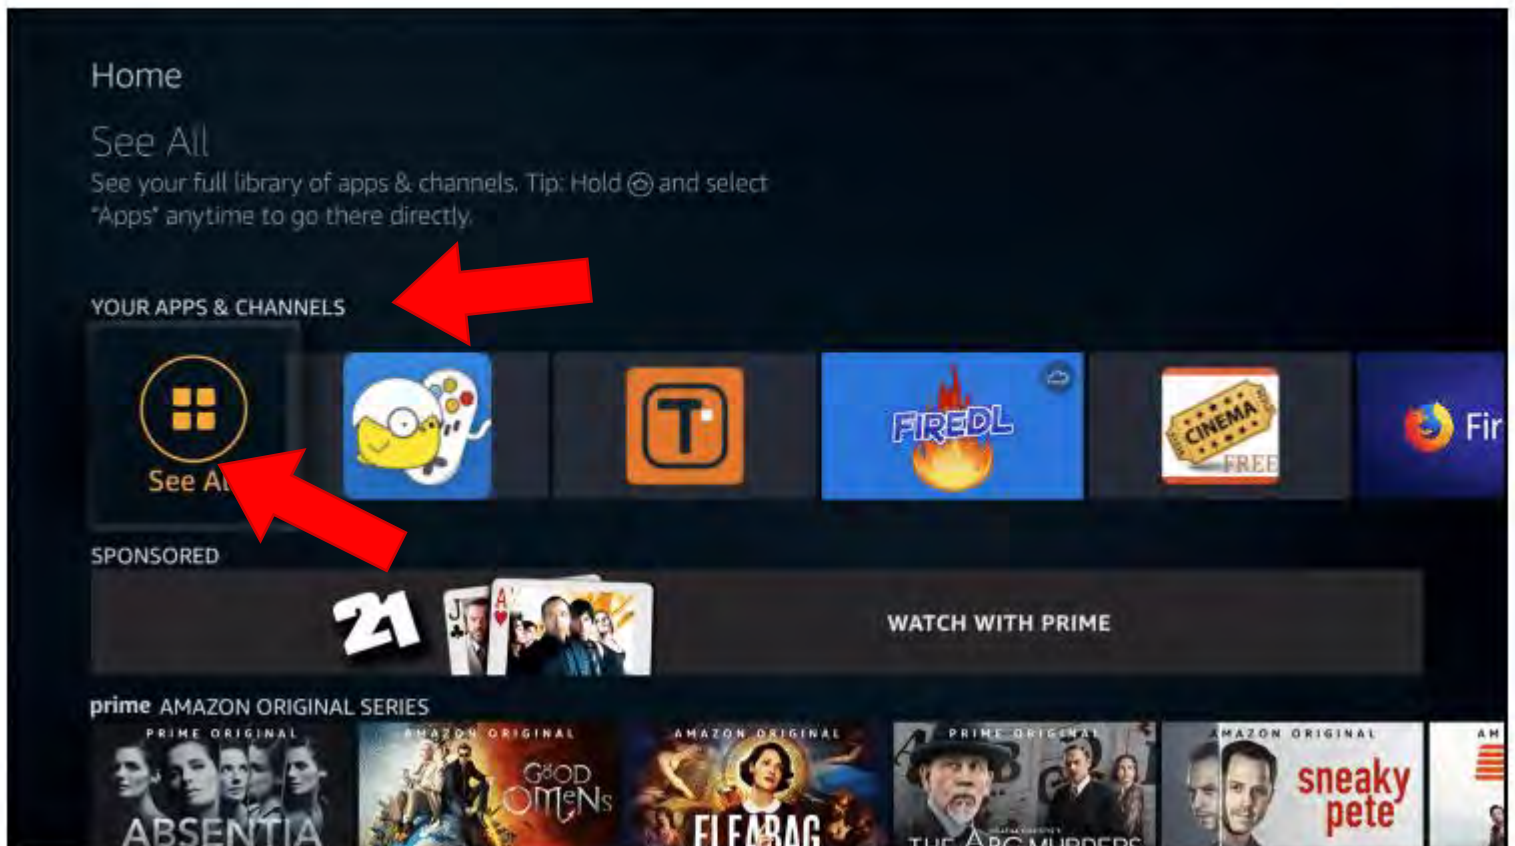

5. The app will start downloading.

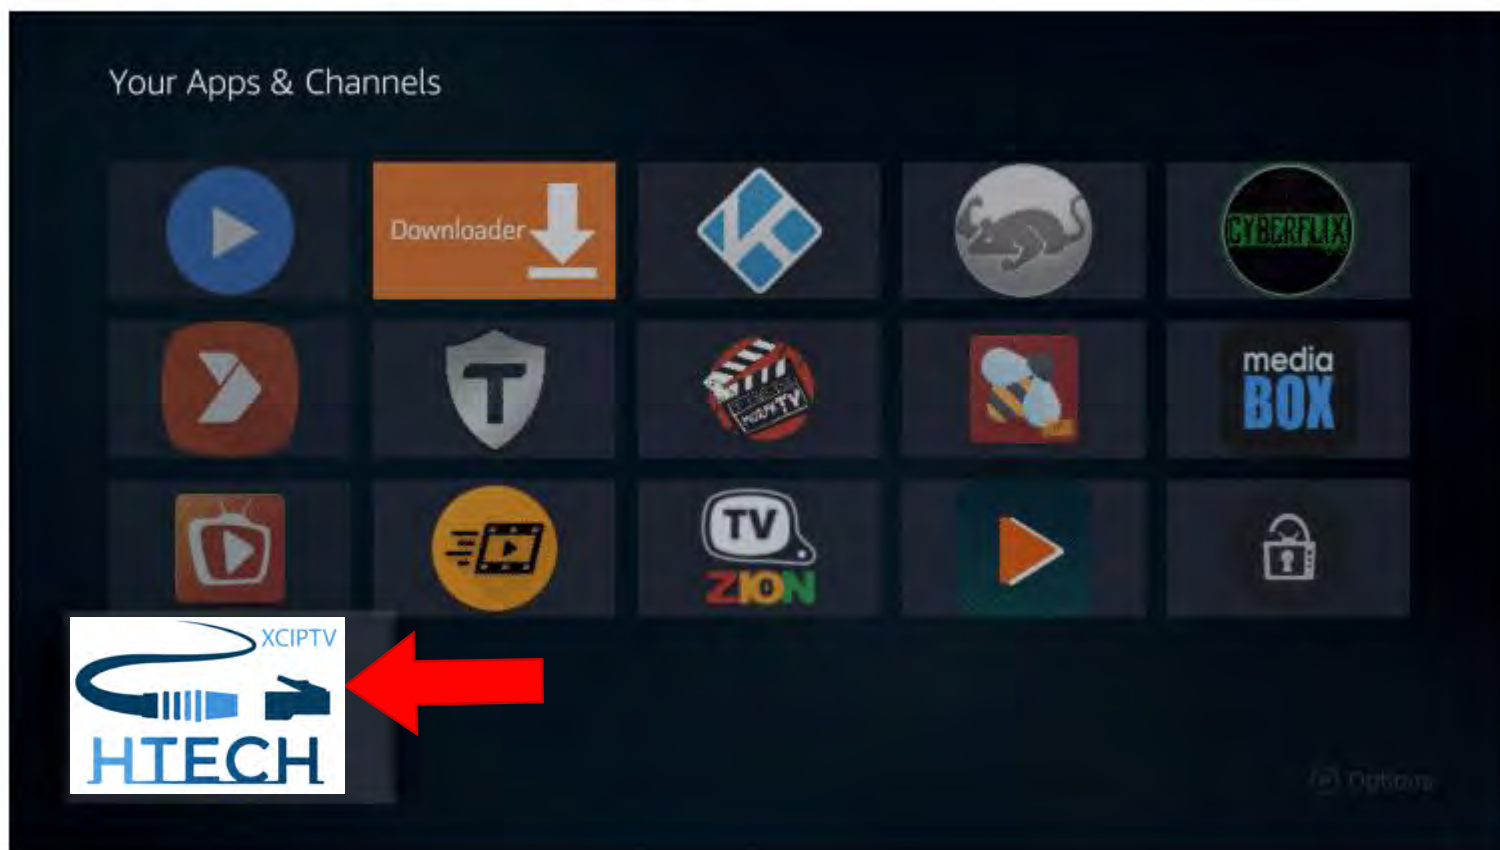

15. Select the *INSTALL* button.

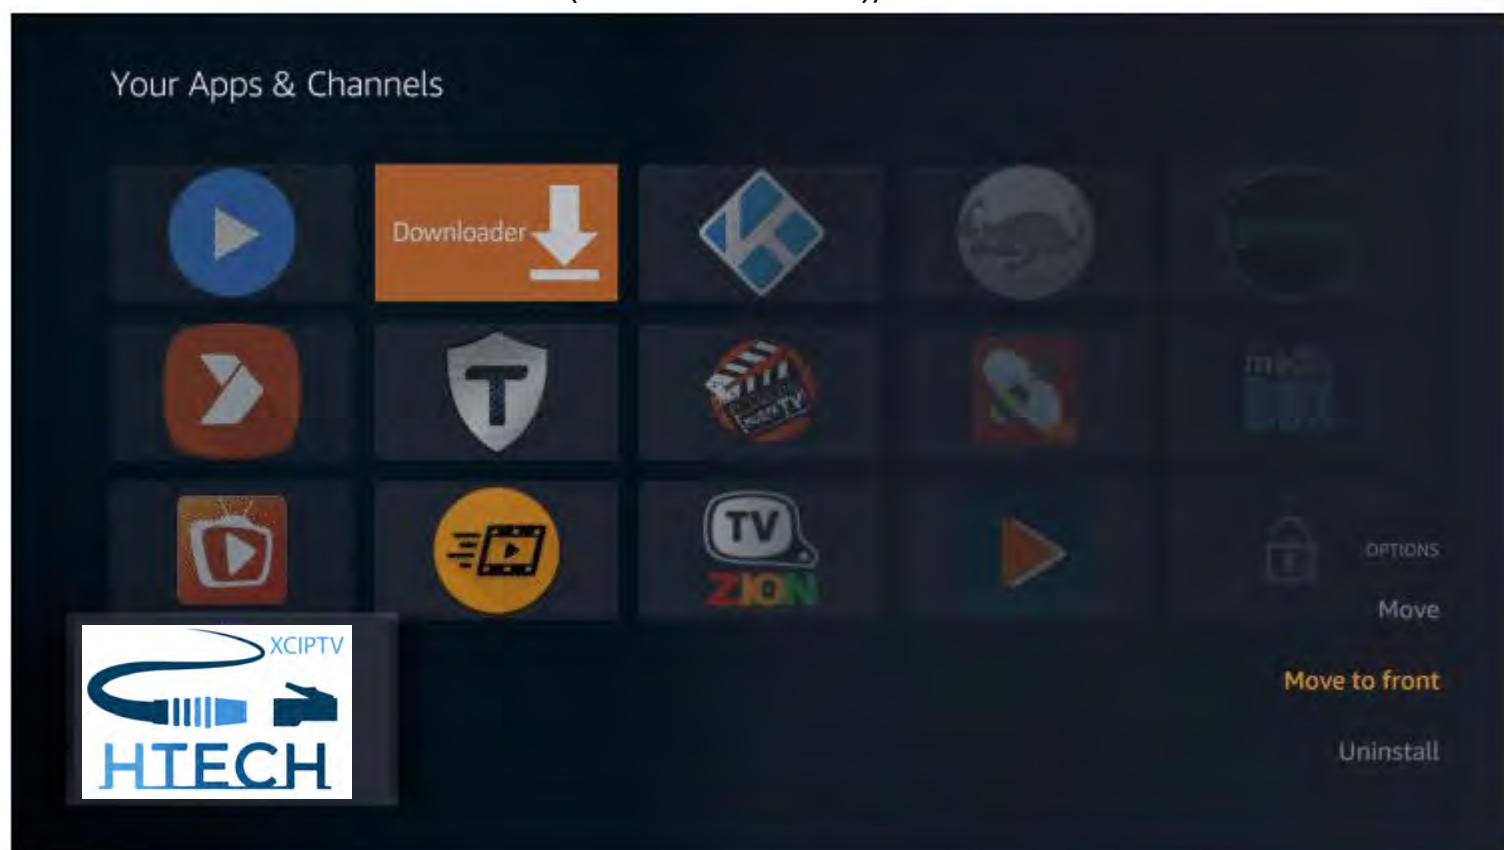

16. Return to the Home screen. Under YOUR APPS & CHANNELS click on *See All*.

17. Scroll down and hover over hTech XCIPTV.

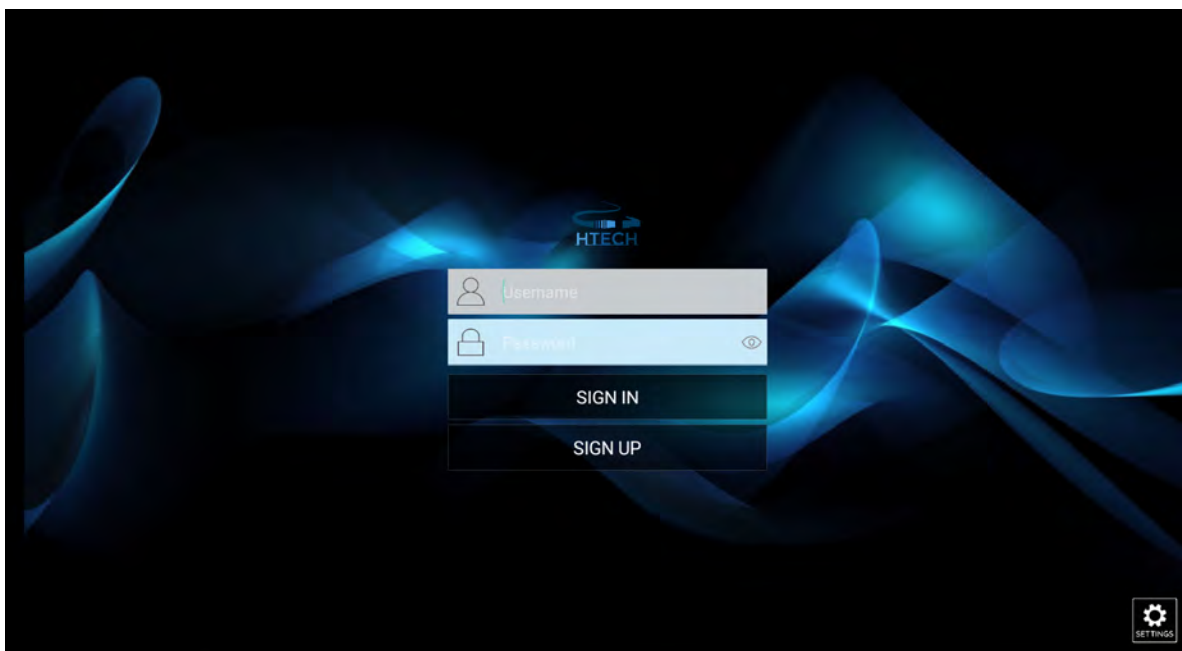

18. This is an extra step to put the app so it shows up on the Home screen. Not necessary but convenient. Click Menu Button on remote (3 horizontal lines), then select *Move to Front*.

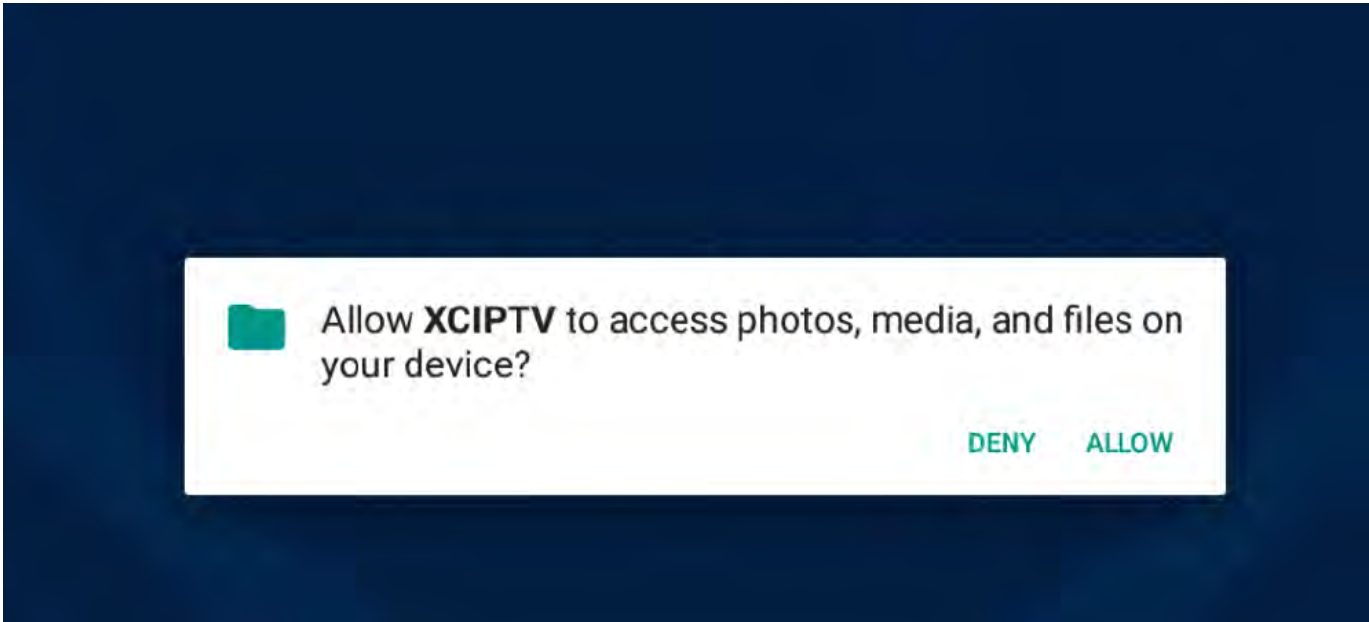

Your app is now installed. Open the app to finish the setup process.

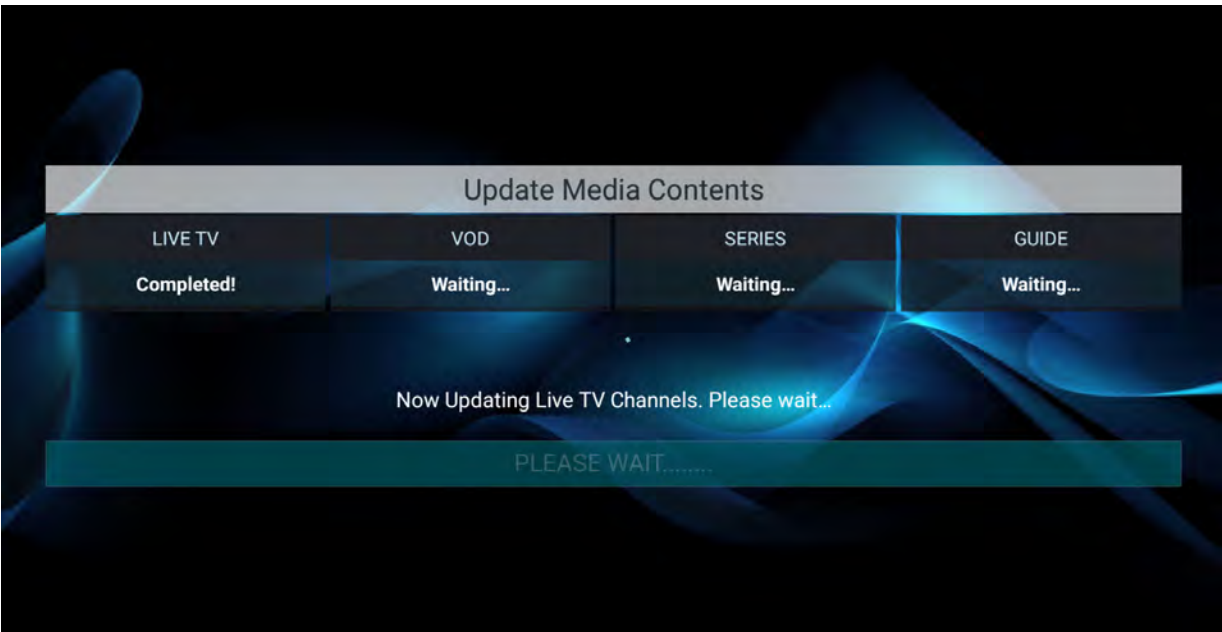

Add YOUR username and password in the text boxes. Click Sign In.

You may get the below pop-up. Click Allow.

The system will connect to the server and update all the data.

Thats it!!! Enjoy
